

Thanks to Betancourt's Adaptodren™, the return of the legendary hormone increasing supplements of the past has finally arrived. Research has demonstrated that D-Aspartic Acid is the testosterone increasing amino acid the supplement industry has been waiting for. Calcium Fructate is the newest testosterone maintaining agent that has been shown in a pilot clinical case study to increase serum and free testosterone in as little as 3 hours. Betancourt's award winning research lab has developed the ultimate testosterone increasing, performance enhancing compound by combining these two power house ingredients into one Adaptodren™ using Protease to increase protein metabolism and Corosolic Acid to promote carbohydrate utilization in the body. Betancourt's Testosterone Booster promotes protein metabolism to maximize muscle fullness, energy, strength and promote a lean chiseled physique.†
