

Suggested usage: 1 capsule per day or as directed by a health professional.
Cautions: As with any supplement, consult your health professional before use if you are pregnant, breastfeeding, or trying to conceive, or if you are taking medication, have a medical condition, or anticipate a surgery. Keep out of the reach of children.

Riboflavin (vitamin B2) plays a key role in the activation and conversion of other B vitamins as well as in red blood cell synthesis, fat and glucose metabolism, and the production and regulation of specific biochemicals.* Riboflavin 5'-phosphate is the coenzyme form of vitamin B2. Taking riboflavin 5'-phosphate allows for greater absorption and bioavailability than non-coenzyme forms.

Manufactured by Natural Factors to ensure safety and potency in accordance with Good Manufacturing Practices (GMP) of the FDA and Health Canada.

Contains no artificial colors, preservatives, or sweeteners; no dairy, starch, sugar, wheat, gluten, yeast, soy, egg, fish, shellfish, animal products, salt, tree nuts, or GMOs. Suitable for vegetarians/vegans. Sealed for your protection. Do not use if seal is broken. For freshness, store in a cool, dry place.

* This statement has not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

What does coenzymated mean?

In order for B vitamins to be utilized effectively by the body, they must be converted into their metabolically active coenzyme forms. For example, the coenzyme form of riboflavin is riboflavin 5'-phosphate.

A coenzyme is a naturally occurring compound that partners with specific enzymes in order to help promote a number of beneficial metabolic reactions in the body. Without the coenzyme, the enzyme cannot promote the biochemical reaction that is responsible for our survival. This dual cooperation between coenzyme and enzyme is a process called coenzymated.

Taking B vitamins already in their coenzymated forms allows the body to use them directly. Thus, the amount that is needed by the body is less in order to achieve the same benefits. BioCoenzymated takes it one step further. Using our proprietary EnviroSimplex® technology, we've created a unique bioCoenzymated process using organic, farm fresh plant extracts from whole food sources and the coenzyme form of B vitamins. The synergy between the phytochemicals found in these plant extracts and the coenzyme B vitamin optimizes absorption.

The results? BioCoenzymated delivers the most metabolically active nutrients to your cells to utilize most effectively.

Feel the difference.
