

Super Flora

Whole Food Probiotic

Fermented Prebiotic Superfoods

Country Farms® Super Flora is the natural way to build and maintain optimal digestive and immune health. Super Flora features two clinically researched probiotics for more effective action and whole food prebiotics to support your digestive tract, which helps promote healthy digestion. Probiotics are “friendly” bacteria that live in your intestinal tract, where they perform important functions for balancing digestive and immune health. Unfortunately, probiotic levels can be depleted by diet, age, stress and medications.†

Each single serving capsule of Country Farms® Super Flora helps maintain a balance of healthy, beneficial bacteria in the intestines. To ensure a complete nutritional balance, take one serving as part of your daily diet for complete digestive health!†

Contains The Patented Probiotics MB40 & SNZ 1969

Bacillus subtilis MB40 is a naturally occurring spore-forming bacteria that is highly concentrated and shelf stable. MB40 boosts probiotic CFU count and delivery to the gut. *Bacillus coagulans* SNZ 1969 is a stable spore forming bacteria that has been used to promote gastrointestinal health for over 45 years. SNZ 1969 survives the gastric acid barrier so it can proliferate in the intestines and perform its beneficial effects.‡

With preB Fermented Whole Food Prebiotics for Optimal Absorption†

preB is a proprietary fermented prebiotic produced from more than 50 whole food ingredients. It follows an ancient Japanese fermentation tradition to produce and concentrate critical phytonutrients, while improving nutritional value and speeding absorption. preB feeds beneficial bacteria in your gut to improve their effectiveness and boost digestive health.‡
