

**NO ARTIFICIAL COLORINGS, FLAVORINGS
OR PRESERVATIVES**

Indigenous people of the tropics have long relied on young coconut water for energy and vitality. **Body Ecology's CocoBiotic** takes the nutritional properties of wild-crafted young coconut water a step further by fermenting it – creating a potent, non-dairy, liquid probiotic. **CocoBiotic** contains special strains of beneficial microbiota which promote a healthy inner ecosystem*

Directions for use: Chill bottle before opening and then slowly release the cap. To use as a probiotic, take several ounces per day. To create a refreshing drink you can also combine 2 ounces with sparkling mineral water and a few drops of stevia. 2 ounces taken with a meal helps promote digestion. Enjoy chilled in stemmed glassware for festive occasions. Batches may vary in color, taste and fizz due to wild-crafted ingredients and the fermentation process.

REFRIGERATE AFTER OPENING.
