

Directions: Take three capsules with each carbohydrate containing meal or as directed by your healthcare practitioner.

PrenuPhase™ is an advanced formula providing comprehensive glycemic and metabolic management support.* Three powerful blends in this formula include:

Prenulin® — a patented formulation of L-Arabinose and Chromax® — has been clinically proven to aid in reducing the body's ability to absorb sugar, thereby lowering glucose and insulin impact by almost 30%.* The L-Arabinose in Prenulin® works by reducing the activity of the digestive enzyme responsible for sucrose digestion while Chromax, the most clinically studied form of chromium on the market, aids in healthy glucose metabolism.*

Phase 2 Carb Controller® is an all-natural, non-stimulant, white kidney bean extract clinically shown to help delay the digestion and absorption of dietary starches by temporarily inhibiting salivary and pancreatic alpha-amylase.* In conjunction with a sensible diet and exercise program, Phase 2® may assist in weight control.*

InnoSlim® is a patented, all-natural ingredient derived from *Panax notoginseng* and *Astragalus membranaceus* using proprietary extraction and processing technologies. InnoSlim® has been shown to help decrease circulating glucose and may reduce glucose absorption in the intestine while reducing fat accumulation.*

*These statements have not been evaluated by the Food and Drug Administration.
This product is not intended to diagnose, treat, cure or prevent any disease.

Caution: Keep out of reach of children.

Storage: Keep tightly closed in a cool, dry place.

This Formula Meets or Exceeds cGMP Quality Standards.
