WARNINGS: Accidental overdose of iron-containing products is a leading
cause of fatal poisoning in children under 6. Keep this product out of
reach of children. In case of accidental overdose, call a doctor or poison
control center immediately.

An anemic condition should be treated under the advice and supervision
of a physician.

Since oral iron products interfere with absorption of oral tetracycline
antibiotics, these products should not be taken within 2 hours of each
other. Iron-containing supplements may occasionally cause bowel effects
such as constipation or diarrhea. If you are pregnant or nursing a baby,
seek the advice of a healthcare professional before using this product.
