Contains wheat ingredients.

Precision Engineered® has created the ultimate post-workout formula to immediately kick start recovery and help drive critical nutrients directly into your muscles.* Each serving provides a potent 5500 mg cocktail of three of the most important aminos needed for athletes and bodybuilders, plus over 4000 mg of our advanced CreaSurge Creatine Complex. CreaSurge is designed to support strength, power and recovery for your toughest workouts.*

In order to maximize creatine storage, it's important to spike insulin levels with fast-digesting carbohydrates.* Our Variable Osmotic Weight Carb Rush Matrix is a next generation blend designed with 45 grams of Waxy Maize Starch and Dextrose per serving. These carbs combine to push more creatine and aminos directly into your cells after exercise, making the Perfect Storm superior to traditional creatine-only formulas.* Fast-digesting carbs are also important for glycogen recovery so you can maximize energy stores for your next workout.* Relying on formulas that provide insufficient carbs may hinder your progress.
