

ENZO Brain Recovery delivers particularly powerful brain support. Formulated at clinically effective dosage levels, it combines two of the best researched brain health ingredients currently known. Latest clinical research has shown that Enzogenol at 1000 mg per day supports healthy recovery of brain functions.* Previous research also showed Enzogenol supports concentration, attention and executive brain functions in generally healthy adults and children.* Clinical research on the particular Omega-3 (40%DHA/10%EPA) used in ENZO Brain Recovery has shown benefits in people with age-related cognitive problems.* The combination of Enzogenol plus Extra-DHA Omega-3 gives your brain the best nutritional support to recover, stay healthy, or improve your cognitive functions.*

This pack of 6 bottles is a complete 90-day supply of ENZO Brain Recovery. In order to take the same amount of Enzogenol that was shown to be effective in clinical studies*, we recommend 5 capsules per day for 90 days. Lower doses may also be effective depending on the individual and the application*. More info at: www.enzobrainrecovery.com
