Contains soy.

Do not use if either tamper-evident seal is broken or missing. Keep
out of the reach of children.

AHCC® (Active Hexose Correlated Compound) is a proprietary compound produced by cultivation of shiitake mushroom mycelia, grown in rice bran extract. Considered a superfood supplement in Japan, AHCC has been researched extensively for its immune enhancement properties. Preliminary research indicates that AHCC may significantly increase Natural Killer (NK) Cell activity. There is also evidence to suggest that AHCC may increase macrophage activity, enhance cytokine production, and support the healthy functioning of the liver as well as act as an antioxidant.*

Suggested Use: 2 capsules twice daily on an empty stomach.

NOTE: If you are pregnant, may become pregnant, or breastfeeding, consult your health care professional before using this product.

AHCC® is a registered trademark of Amino Up Chemical Co., Sapporo, Japan.
