

OVERHAUL YOUR ENDURANCE

It's a simple equation: increase oxygen-rich bloodflow to working muscles, and you will increase exercise performance and shorten recovery periods between workouts. ConDense® is the first and only preworkout to achieve a tenfold (10x) increase in NOx levels, in humans, by way of our proprietary Nitratene™.†

ConDense® usage: Mix 1 serving with 8 ounces of cold water and consume 30 minutes prior to intense exercise. ConDense® can be used on nontraining days as well. Do not consume more than two servings at any one time. Do not use more than twice daily.

WARNING: ConDense® is intended only for healthy adults over the age of 18. Do not use if you are currently pregnant or nursing, could be pregnant, or are attempting to become pregnant. Consult a licensed healthcare practitioner before using this product. Do not use this product if you have been diagnosed with or have a family history of (including, but not limited to) heart disease, thyroid disease, liver disease, diabetes, hypoglycemia, hypo/hypertension, asthma, Barrett's Esophagus, gastroesophageal reflux, any psychiatric condition including depression or seizure disorder, or if you are using any prescription drug, or over-the-counter drug, in particular those intended to treat erectile dysfunction or blood pressure disorders. Discontinue use and contact a doctor immediately if you experience an irregular or rapid heart beat, chest pain, shortness of breath, dizziness, lightheadedness, fainting or presyncope, tremors, headache, nausea, or other similar symptoms. If you are a performance athlete, please check with your sanctioning body prior to use to ensure compliance.
