From the leader in Vitamin B-complexes, comes Country Life's most advanced "coenzymated" formulation yet. This powerful and revolutionary complex provides essential B-Vitamins in a form the body can use.** This new formula supports increased energy production, nervous system support, and sugar metabolism.**

Coenzyme B-Complex Advanced includes next generation essential B-Vitamins not found in other products:

Country Life is unique to include **NADH**. **NADH** is a coenzyme found in all living organisms that supports energy production.** As it is derived from dietary niacin, it is its own true coenzyme.**

Benfotiamine is the next level of Vitamin B-1 that is fat soluble, allowing it to quickly convert in the body.** This vitamin supports a healthy nervous system.**

Then comes **PQQ**, which has been proposed as the next essential B-Vitamin. **PQQ** has been shown to help increase mitochondria production.** Mitochondria are the power plants inside each cell that produce energy.

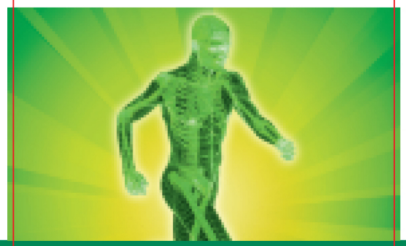

And as with all Country Life's Coenzyme B-complexes, this formula contains **Methyl Folate**. Country Life uses a patented form called Quatrefolic®, a new and improved fourth generation of folate. Folic acid is known to be critical in the maintenance of the nervous system.**
