

Many weight-loss supplements include ingredients that block the absorption of fat. While this is helpful for preventing weight gain, it does nothing to reduce the body fat you already have.

Lipoquel™ is different. It contains Chitoglucan™, a patented, clinically proven extract of the edible enokitake mushroom. Chitoglucan combines a unique bioactive form of vegetable chitosan, which blocks the absorption of fat, with a proprietary lipid complex, which helps burn the fat you already have.*

Two double-blind human clinical trials have shown that compared with placebo, Chitoglucan decreases body fat — including belly fat — promotes weight loss, and reduces waist circumference.*

For best results, combine Lipoquel with a healthy diet and regular exercise, which can work synergistically to maximize weight loss.
