CELL-TECH™ is a scientifically engineered hardcore creatine formula designed for hardgainers who have trouble putting on size and strength. This patent-protected creatine formula contains core ingredients supported by over 30 research studies conducted over multiple decades. CELL-TECH™ is packed with powerful musclebuilding ingredients and is formulated to deliver:

Each two-scoop serving of CELL-TECH® delivers 5g of HPLC-certified creatine monohydrate and 5g of creatine citrate.

In another study, subjects taking the amount of creatine and carbohydrates found in two scoops of CELL-TECH® significantly increased their strength on the bench press, leg press, and bicep curl. *

Each two-scoop serving of CELL-TECH® includes 200mg of the powerful compound alpha lipoic acid (ALA). Research suggests that ALA helps improve the absorption of creatine and glucose into the muscle cell through specialized transporters.*

CELL-TECH™ delivers a multi-stage combination of carbohydrates that forces a powerful insulin spike post-workout. This helps shuttle creatine and other nutrients into the muscle and rapidly replenishes glycogen stores, facilitating glycogen supercompensation and an intense muscle-expanding effect. ★

A clinical study revealed that the use of CELL-TECH® did not lead to the down regulation of creatine transporters. This allows athletes to continue to benefit from creatine use, instead of cycling on and off.*

In addition to its key musclebuilding ingredients, CELL-TECH™ supplies the branched chain amino acids L-leucine, L-valine and L-isoleucine in a 2:1:1 ratio. Branched chain amino acids are free-form amino acids - singular molecules that are quickly digested and absorbed into the bloodstream. CELL-TECH™ also contains the amino acids taurine and alanine. These free-form amino acids are two of the most abundant amino acids in muscle and aid in cell volumization.

Unlike the competition, Performance Series products contain superior key ingredients in clinically dosed amounts that are fully disclosed, so you know exactly what you are paying for.

CELL-TECH™ was favored by one of the world's top flavoring houses by leading flavor experts in order to taste better than any other creaming powder on the market.
