

BCAA 6000™ SUPER HIGH POTENCY BCAA FORMULA

BCAA 6000™ from Gaspari Nutrition uses a "leucine heavy", 4:1:1 ratio of 100% pure pharmaceutical grade branched chain amino acids in a formula that provides clinically validated and effective quantities of these critical nutrients in every dose. The branched chain amino acids (BCAA's) got their names due to their unique molecular structure that are different from the other amino acids. All BCAA's are considered "essential amino acids" because your body can't synthesize them from other compounds and they must be obtained through your diet. Bodybuilders and other high level, advanced athletes have known for years that the BCAA's are responsible for helping to increase protein synthesis which can lead to faster recovery time, increased lean muscle mass and increased performance and endurance all around. The addition of advanced, highly bio-available forms of Vitamin B-6 and Vitamin B-12 to the BCAA 6000 complex will also help to enhance your energy levels and endurance helping to further maximize your training while simultaneously enhancing recovery.

SUGGESTED USE: As a food supplement, orally ingest one (1) serving of six (6) tablets with 16-20 ounces (~500 mL) of water or your favourite beverage. Consume 1 serving each day. For best results, use this product as part of a proper diet and exercise program.

WARNING: BCAA 6000 tablets are large and may be difficult to swallow, please consume with at least 16 ounces (~500 mL) of water or suitable fluid. Keep out of reach of children. Consult with a physician or your qualified health care provider before using this product or any other dietary supplement. This product contains milk, shellfish and beef derived ingredients. Not for use in individuals under 18 years of age or in women who may be pregnant or who are nursing. Store at room temperature (55°-85° Fahrenheit or 13°-30° Celsius). Keep out of direct sunlight. Keep bottle tightly closed.
