RAPID PERFORMANCE & RECOVERY SUPERCARB™

Performance endurance requires fuel, Carbs = fuel! Carbohydrates fuel the body's glycolytic and anaerobic ATP-PC energy systems for true athletic power performance. However, not all carbohydrates are created equal. For optimal performance there must be a balance between how much you take in and how fast it leaves your stomach (gastric clearance rate) to avoid potential cramping. Gaspari researchers utilize proprietary Osm Technology to finely tune Glycofuse in solution to ensure a low osmolality to achieve this balance which means a faster gastric clearance! We have chosen to deliver only pure HIGHLY BRANCHED CYCLIC DEXTRIN to athletes looking for a clinically studied carbohydrate for their high performance power, glycogen loading, and endurance needs with a proven track record. Do you want fuel for your workouts and rapid replenishment for the next training session? Do you want sustained energy and balanced glucose levels which won't inhibit fat burning? If you want all that, then you want Glycofuse.

BUILD CONFIDENCE, BUILD STRENGTH, FUEL YOURSELF.

JUST THE FACTS

25G PURE HIGHLY BRANCHED CYCLIC DEXTRIN PER SERVING

ACCELERATES PERFORMANCE AND GLYCOGEN LOADING

RAPID GASTRIC CLEARANCE USING OSM TECHNOLOGY

LOADED WITH ELECTROLYTES

SUGAR AND GLUTEN FREE
