Amplified Maxertion N.O.™

In a study, a group of 25 participants exercised on the treadmill on two occasions. On one occasion, they used the Calorie Burn Blend in this formula 60 minutes before exercise and on the second occasion, they took a placebo. Results showed a 300% increase in calorie burn before exercise for those who took the

* In a randomized, double-blind, placebo-controlled study, 50 healthy untrained exercised on a cycle ergometer prior to receiving the supplement or placebo and again after the treatment period was finished. Those subjects supplemented with Amplified Maxertion N.O." had a 20% increase in PWCFT (physical working capacity at the fatigue threshold) after four weeks of supplementation relative to the

In a clinical study of 17 healthy young adults, muscle biopsy results revealed that GNC Pro Performance® AMP Amplified Creatine 189* resulted in 189% greater muscle creatine uptake relative to benchmark amounts of ordinary creatine

In a double-blind, placebo-controlled cross-over study of 20 healthy young adult taking this enzyme blend were less affected by DOMS, which enabled them to have a stronger workout than when taking the placebo.

‡ In a randomized, double-blind clinical study of 57 healthy young adult males. subjects who took GNC Pro Performance® AMP Amplified Creatine 189™ containing only 1.25 grams creatine significantly improved leg press 1-RM performance by 54 lbs, while subjects on 5 grams of creatine monohydrate improved by 52 lbs. and the placebo group demonstrated no significant improvement

** Based on 15 workouts monthly
