

Complex Blend of Amino Acids and Electrolytes to Keep You Fueled and Going Strong!

GNC Pro Performance® AMP Endurance Booster Chews have been developed by GNC scientists and leading exercise and sports nutrition experts to address the three key steps to improving endurance – recovery, stamina and hydration.* With this formula you get superior results before, during and after your activity. Created specifically for elite athletes to improve endurance, AMP Endurance Booster Chews will help you outperform your personal best, and the competition.

Phase 1: AMP Endurance Booster Chews protect the body from the damaging effects of free radicals and provide the building blocks the body needs to recover from intense sporting activity. Quite simply, these chews help you bounce back and come back better than ever.

Phase 2: Boosting your athletic performance takes more energy in the body, and more stamina to stay out there and push harder. AMP Endurance Booster Chews give your body the rapid source of clean energy it needs to get moving quickly and provides the sustained energy sources you need to keep pushing long after you've started.

Phase 3: Peak athletic performance can't happen without proper hydration. By providing key electrolytes and clinically studied key ingredients, AMP Endurance Booster Chews keep your body hydrated.* With improved hydration you reduce the risk of cramping, helping you push that much harder, for longer.

KEEP OUT OF REACH OF CHILDREN.

Store in a cool, dry place.
