

Greens That Provide Mighty Phytonutrients!

There is a common thread between high energy levels, higher metabolism, healthy weight, anti-aging, strong bones, a healthy immune system, reduced appetite, and overall good health. The answer is Phytonutrients, which you get through proper daily intake of fruits and vegetables.

PhytoMyte™ Greens contains an assortment of carefully selected fruits, vegetables and grasses for optimal nutrient delivery. Numerous studies have revealed that these specialized plant nutrients actually protect tissues and cells from free radicals and their harmful effects while detoxifying the body as well.*

PhytoMyte™ Greens uses a technological breakthrough in capturing and retaining the fragile nutrients and phytochemicals in fresh fruits and vegetables. Many of the fruits and vegetables used in **PhytoMyte™** are produced using a freeze dried process where the moisture is removed from the frozen product using an ultra-low temperature and a vacuum. The original nutrients are maintained and delivered in each serving in as close as one can get to their natural state.
