

SYNGEX[®]

†SYNERGISTIC WHEY PROTEIN BLEND

†The All New SYNGEX[®] Protein with SFRO™ – SpiroFuse Reverse Osmosis™

VPX[®] is proud to bring you a cutting edge NEW Whey Protein Isolate called, SpiroFuse Reverse Osmosis™ or SFRO™! This invention is Whey Protein Isolate by Reverse Osmosis SpiroFuse Filtration™ or SFRO™. Roughly 10 years ago VPX was the first company ever to release a ceramic filtered Whey Protein Isolate supplement called, cross flow microfiltration. This created quite a stir in the supplement industry because until this time, only whey protein concentrate (WPC) or low grade Ion Exchange WPI was available. As you can imagine there have been significant improvements in whey protein technology over the past 10 years. As a result of these superior scientific advancements, VPX is utilizing super high tech new membrane systems that produce isolated proteins that are 99%+ pure and are ultra rich in potent low molecular weight micro-fractions (LMWF). VPX is also using a new Whey Protein Concentrate that is designed to keep the fat globule portion of the protein intact which preserves the integrity of the naturally occurring IGF-1 and IGF-2. Consequently, SYNGEX[®] was born – a synergistic blend of the world's most cutting edge Whey Protein Isolate and Concentrate! The SYNGEX[®] flavoring system is also NEW and developed by VPX flavor experts. These new potent proteins and flavor technologies are only available inside of SYNGEX[®] Protein and other VPX protein products. VPX is creating the future of muscle science, bodybuilding and performance enhancement for your success.

The most consistent and effective way to lose weight and unwanted body fat is by consuming a high protein/low carbohydrate diet (with moderate dietary fat intake). This is primarily due to the fact that protein has a spectacular three-phase assault on body fat: 1) protein causes the body to release a hormone called glucagon that frees up stored body fat to be used as energy, 2) protein builds muscle tissue – the site at which fat is burned; consequently, more muscle equals greater fat burning capacity, and 3) to digest protein, the body has to expend a great deal of energy; this process is called the "thermic effect" of dietary protein. Protein produces by far the greatest thermic effect of any food.

While it is true that one of the keys to losing weight is to expend more calories than we consume, the most important secret for long term fat and weight loss is to control the hormone insulin. Insulin release is consistent with the amount and/or type of carbohydrates we consume. This hormone also causes our body to store fat and can also prevent stored body fat from being utilized as energy. However, if we control insulin with a low carbohydrate diet, we can also reduce our body weight and body fat. SYNGEX[®] Protein is a synergistic blend of Whey Protein Isolate & Concentrate and can be utilized to supplement any type of low-carbohydrate diet. Protein is unquestionably the single most important nutrient for dramatically redefining and improving your physique. Do what many of the greatest professional athletes, bodybuilders and movie stars have done – make VPX an integral part of your supplementation program today!

NEW

SYNGEX[®]

†SYNERGISTIC WHEY PROTEIN BLEND

- †New SFRO™ (SpiroFuse Reverse Osmosis™) Whey Protein Isolate!
- Whey Protein Isolate by Reverse Osmosis SpiroFuse Filtration™!
- Intact Fat Globule IGF-Rich Whey Protein Concentrate!
- Teaming with Bio-Active Protein Micro-Fractions!
- MST™ Micro-Fraction Selection Technology™!
- Awesome Taste Engineered by VPX Flavor Experts!

DIETARY SUPPLEMENT

NET WT. 5 lbs. (2.25Kg)

Supplement Facts

Serving Size 1 Scoop (30 g)
Serving Per Container 75

Amount Per Serving	%Daily Value
Calories 120	
Calories from Fat 25	
Total Fat 3 g	5%*
Saturated Fat 1 g	5%*
Cholesterol 50 mg	17%*
Sodium 95 mg	4%*
Potassium 160 mg	5%*
Total Carbohydrate 3 g	1%*
Dietary Fiber 1 g	4%*
Sugars 2 g	**
Protein 20 g	40%*
Vitamin A 100 IU	2%
Vitamin C 1 mg	2%
Calcium 150 mg	15%
Iron 1 mg	6%
Magnesium 15 mg	4%

*Percent Daily Values are based on a 2,000 calorie diet.
**Daily Value not established.

Other ingredients: proprietary bioactive protein matrix: whey protein concentrate, whey protein isolate; natural & artificial flavors, dipotassium phosphate, tripotassium phosphate, sodium polyphosphate, sodium chloride, Sucralean[®] brand sucralose and acesulfame potassium.

Allergen Information: Contains milk and soy (as soy lecithin). Contains NO soy protein.

Allergen Warning: Produced in a facility that processes milk, egg, soy, wheat, tree nuts and peanut.

† When combined with resistance exercise and a sensible diet, use only as a dietary supplement. Do not use for weight reduction.

† These Statements have not been evaluated by the FDA. This product is not intended to diagnose, treat, cure or prevent any disease.

KEEP OUT OF REACH OF CHILDREN. STORE IN A COOL, DRY PLACE. CONTENTS SOLD BY WEIGHT NOT VOLUME; SOME SETTLING MAY OCCUR.

DIRECTIONS FOR USE: For a great tasting, delicious shake combine each scoop of SYNGEX[®] Protein with 4-6 ounces of cold water (depending on personal preference for desired thickness). For added body blend two or three ice cubes with SYNGEX[®]. Use 2-3 servings daily. Always drink 12 to 16 ounces of additional water for each protein shake consumed.

100% WHEY PROTEIN

THE POWER OF SYNGEX[®] W/ SFRO™

New SFRO™ Whey Protein Isolate as SPIROFUSE REVERSE OSMOSIS™!W Whey Protein Isolate by Reverse Osmosis SpiroFuse Filtration™! Intact Fat Globule IGF Rich Whey Protein Concentrate! R Rich in Bio-Active Protein Micro-Fractions!M MST™ Micro Fraction Selection Technology™! Awesome taste engineered by VPX flavor experts!

ZERO Corn Syrup Solids Or Hydrogenated Oils
ZERO Fat-promoting High Glycemic Index Maltodextrins
ZERO Caseinates, Ion Exchange or Other Old-School Proteins
ZERO Estrogen Promoting Inferior Soy Proteins
