

Suggested Use: As a dietary supplement, adults take one (1) tablet, two (2) times daily between meals, or as directed by a health care professional. Store in a cool, dry place and away from direct light.

Keep out of reach of children.

SAM-e is produced in small amounts by the human body, where it is an important physiological factor in the production of many compounds. However, the body does not always produce adequate amounts of SAM-e and supplementation is sometimes required.

SAM-e has been the subject of many scientific studies in Europe. Thousands of Europeans have experienced a multitude of benefits from twenty years of its clinical use.

SAM-e strongly absorbs moisture from the environment, which can lead to a compromise in its overall quality. Consequently, our SAM-e tablets are carefully enteric-coated for the strongest protection.
