DIRECTIONS: As a dietary supplement, mix 1 scoop (4,488 mg) with 8 to 12 ounces (250-350 ml) of cold water and consume 30 to 45 minutes before activity. Due to its extreme strength, it is highly recommended that you assess your individual tolerance and start out by using only 1 scoop (1 serving) before you try consuming 1½ or 2 scoops. RIPPED FREAK® PRE-WORKOUT is so strong that many individuals find 1 scoop is more than strong enough to deliver maximum results.

CAUTION: NEVER EXCEED 2 SCOOPS (2 SERVINGS) PER DAY!

WARNINGS: KEEP OUT OF REACH OF CHILDREN. Not intended for persons under 18 years of age. Do not use if you are pregnant or nursing. Consult a physician before using this product if you have a medical condition, if you require surgery, or if you are taking prescription or over-the-counter medication. Do not exceed 2 servings (2 scoops) in a 24-hour period and do not take within 4 hours before bedtime. One serving of this product (1 scoop) contains about as much caffeine as two 8-ounce cups of coffee and should not be taken by individuals wishing to eliminate caffeine from their diet. Do not use with caffeine-containing medications, foods and beverages, because too much caffeine may cause nervousness, irritability, sleeplessness, and, occasionally, rapid heartbeat. Do not exceed recommended serving as improper use does not enhance results. Store in a cool, dry place.
