

Complete H₂O Minerals

*Keeping people healthy
one cell at a time!*

As we age and/or are stressed, our body's requirements for certain minerals is increased. This blend of minerals is specifically intended to help support several organ systems. They have no innate ability to heal, they just give the body's cells the necessary nutrients to do the jobs they were designed for. These minerals are vital co-factors for many of the body's enzymatic cascades i.e. by their presence they facilitate these vital reactions.

Our water undergoes a six step purification process: reverse osmosis, deionization, ozonation, charcoal filtration, dual micron filtration and ultra violet light sterilization. RDA guidelines are observed.
