

Sports Blend Electrolyte

Liquid Minerals

Sports Blend is a proprietary blend of ionic Angstrom minerals that helps maintain the body's electrolyte balance during and after activities. Sports Blend helps the body recover from hard workouts, strenuous activity, or any athletic event. Sports Blend works directly with cellular absorption and utilization at the Angstrom level.

Our water undergoes a six step purification process: reverse osmosis, deionization, ozonation, charcoal filtration, dual micron filtration and ultra violet light sterilization. RDA guidelines are observed.
