

Complete H₂O Minerals

Van-Chr-Zin is a blend of vanadium, which helps regulate HDL (good cholesterol) in the brain, spinal cord, and nervous system; chromium, which helps increase the body's sensitivity to the hormone insulin for efficient utilization of surplus glucose; and zinc, which is necessary for tissue repair and growth, as well as playing a key role in good vision.

Our water undergoes a six step purification process: reverse osmosis, deionization, ozonation, charcoal filtration, dual micron filtration and ultra violet light sterilization. FDA guidelines are observed.
