

## POWERFUL NATURAL COMPOUND FOR INCREASING MUSCLE MASS & DECREASING BODY FAT

Ursolic acid – the active ingredient in Ursobolic – is nothing short of amazing. In a very recent landmark study ursolic acid was demonstrated to profoundly increase muscle mass and strength. This effect was found to be mediated in large part by up-regulation of muscle specific IGF-1 expression – basically the key cellular signal in muscle growth. In addition to the muscle mass gains, ursolic acid was found to stimulate substantial fat loss. Ursolic acid has been demonstrated to have several other remarkable physiological effects as well, such as modulation of cortisol through 11 $\beta$ -HSD1 inhibition, inhibition of aromatase enzyme, anti-cancer activity, and stimulation of bone growth. Ursobolic contains nothing but high dose, high quality ursolic acid extracted from natural sources.

**CAUTION!:** This product is only intended to be consumed by healthy adults 18 years of age or older. Before using this product consult with your physician if you are using any prescription or over the counter medicine, if you are unaware of your current medical condition or if you have any pre-existing medical condition. Discontinue use and consult your health care professional if you experience any adverse reaction to this product. Do not exceed recommended serving. Store in a cool, dry place with lid tightly closed. Do not use if inner safety seal is broken or missing. Keep out of reach of children.
