

BODY FORTRESS® BCAA 2200

Body Fortress® has formulated a powerful blend of the three Branched Chain Amino Acids that many “Industry Insiders” consider to be very important for any serious bodybuilders or athletic program. Isoleucine, Leucine and Valine, collectively known as BCAAs, are combined with high potency B-6 to take your training to another level.*

Body Fortress® BCAA 2200 Benefits:

- Provides dual benefits since BCAAs can be used to build protein or broken down in muscle to supply a direct source of energy.*
- Provides muscle nitrogen support for a variety of metabolic functions, which can be especially important during heavy training.*
- BCAAs are critical for bodybuilders as they make up a large percentage of the amino acid composition of muscle.*
- BCAAs are also the only aminos that are directly metabolized in the muscle as opposed to the liver.

Directions: For adults, take four (4) softgels before or after your training session. As a reminder, discuss the supplements and medications you take with your health care providers.
