

Buffered Vitamin C Powder

Buffered Vitamin C contains high-purity ascorbic acid buffered with carbonates of potassium, calcium, and magnesium. Although the elaborate process of producing cassava root source vitamin C has one step that involves the use of corn-derived alcohol, this formula is generally well tolerated by corn allergic individuals.

Suggested Use

As a dietary supplement, 1/2 heaping teaspoon in 8 to 12 ounces of liquid, between meals, or as directed by a healthcare practitioner. Two teaspoons supply approximately the recommended dietary allowance of calcium and magnesium.

Appropriate for most food-sensitive individuals.
