

SUGGESTED USE:

As a dietary supplement, take 4 capsules daily, or 1 hour before training.

D-Aspartic Acid is a naturally occurring amino acid within the body, where it plays pivotal roles in the manufacturing hormones. Recent studies have shown that supplementing with D-Aspartic Acid daily can raise testosterone. An increase in testosterone may lead to increases in muscle mass and athletic performance, along with decreases in body fat and levels of fatigue. ‡

WARNING: Not to be used by women or men under 18 years old. Use of this supplement could trigger a failed drug test from various sports governing agencies. Although this is a completely all-natural product, elevation of testosterone levels can cause side effects including, but not limited to: acne, hair loss and swelling of breast tissue. Discontinue use and consult a physician if any adverse reactions occur. Do not use if you are being treated for or could develop any medical, psychiatric or emotional condition. Do not use in conjunction with any prescription drugs. Store in a cool, dry, dark place.

KEEP OUT OF REACH OF CHILDREN
