

Quick tips for Dry Eyes:

- Warm Compresses can improve lid function
- Drink plenty of water. Good hydration helps tear production
- Use a humidifier in the bedroom at night
- Goggle style sunglasses can reduce airflow across your eyes and slow evaporation
- Avoid diuretics like coffee which are dehydrating
- Computer monitor should be positioned so that the eyes are looking down at it slightly. This will ensure the eyelids are in a slightly closed position which reduces tear evaporation.

NOTICE: Those taking Coumadin (warfarin) or heparin, pregnant and lactating women, or people with a medical condition, should consult their doctor prior to use.

EyeScience Dry Eye Formula™ is a physician formulated, next-generation dietary supplement that addresses the underlying causes of dry eye syndrome.

Although eye drops may provide temporary relief, vitamin therapy in conjunction with eye drops can help treat the cause, not just the symptoms.

EyeScience Dry Eye Formula™ is a unique oral supplement that may improve your treatment results. Our cutting-edge formula targets the causes of dry eye syndrome from the inside out.* For you, that means you'll be taking the most proactive steps possible towards continuous relief from dry eye discomfort.

It can take as long 4-8 weeks to feel the full benefits, so please be patient. With time, when taken as directed in addition to drops, many users will experience long term and sustained relief from irritating dry eye symptoms.*
