

NATADROL®

Natadrol® may be the strongest prohormone replacement on the market today. Natadrol® is a natural, non-steroidal androgen that mimics the effects of strong prohormones; however, the ingredients in Natadrol® should not cause users to test positive on any drug test. Natadrol® does not contain any anabolic steroids but does show in the scientific literature to bind to and activate the androgen receptor. This completely natural product is so potent at binding to, and stimulating the androgen receptor, that we suggest a mild Post Cycle Therapy for 1-2 weeks following a 4-8 week cycle using an over-the-counter product like our Formadrol®, T-911®, or similar products.

SUPPLEMENT FACTS

Serving Size: 1 Capsule

Servings Per Container: 120

%DV

Proprietary Blend

Natadrol Complex

550mg

Androgenic Fraction

Tinospora Cordifolia (Highly Specialized Ethanolic Extract)

**

Anabolic Factor

Cissus Quadrangularis (Highly Standardized)

**

pSARM CoFactors

Hibiscus Rosa-Sinensis (Highly Standardized)

**

Curculigo Orchoides (Highly Standardized)

**

** Daily Value not established

Other Ingredients: Microcrystalline Cellulose, Magnesium Stearate, FD&C Blue Dye #1, FD&C Red Dye #40, Titanium Dioxide

Recommendation: As a dietary supplement designed to replace prohormones, take 4-6 capsules per day in divided doses with your meals. Use for 4-8 week cycles. We recommend a mild over-the-counter Post Cycle Therapy with this product after your cycle to kick-start your natural testosterone production. Although this is NOT a steroidal product it will have the same risks and benefits of common prohormones. It should not in any way make you fail a drug test for anabolic steroids, but please always check with your governing body should you have a question.

WARNING: KEEP OUT OF REACH OF CHILDREN

Product use should be strictly limited to healthy adults above the age of 18. Discontinue use if there are any side effects. Always consult your healthcare professional before use especially if: you are taking any prescription drugs, beginning any new diet and exercise program, or you have any health concerns or pre-existing conditions. Do not use this product if you are at risk for heart disease, high blood pressure, heart, kidney, thyroid, psychiatric disease, difficulty in urinating, prostate enlargement, anxiety, depression, seizure disorder or stroke. Do not take if you are pregnant or nursing. Product efficacy depends on proper diet and exercise. Discontinue two weeks prior to surgery, do not exceed recommended dosage.

*although we know of no possible way that this product would make you test positive, please check with your governing body should you have any questions. 1) Phytomedicine. 2009 Jun;16(6-7):679-82.
