

Somatomax® Ultra Concentrate contains a unique design of nutraceutical compounds to help support natural, healthy neurotransmitter activity for optimizing daytime and nighttime cognitive opportunity.

Somatomax® Ultra Concentrate is used by many people as a daytime formula, in lesser serving amounts, to support enhanced energy and mental alertness, promote an elevated mood, support increased libido and a heightened sexual experience, promote tranquility and relaxation, and induce a remarkable, feel-good experience.

Somatomax® Ultra Concentrate is also used by many people as a nighttime formula, in greater serving amounts, to support deeper, more restful and rejuvenating sleep, by promoting greater ease in falling asleep and by helping to maintain uninterrupted sleep throughout the night. Improved sleep also supports a muscle building program by improving recovery times, and staying out of a catabolic state.

Whether you want to light up your day, or you're ready to tap out for the evening, you will love getting there with **Somatomax® Ultra Concentrate!**

Somatomax® Ultra Concentrate... What a dream!
