TOKKYO EQ

Oral Hypertrophy Amplifying Complex*

EXTREME

TOKKYO NUTRITION™

Steroid users love the effect of Equipoise (boldenone) because of its high ratio of anabolic to androgenic properties. Equipoise produces highly maintainable gains in dry muscle mass and highly maintainable strength progression. Tokkyo Nutrition presents Tokkyo EQ Extreme, for people who do not have access to Equipoise because of its illegal status. Almost all of the progress you make while taking Tokkyo EQ Extreme will be maintained after discontinuing its use. This is highly favored by trainers who do not enjoy going through the "ups" and "downs" of steroid or prohormone cycling.*

Note: If you are a professional or amateur athlete subject to performance enhancing substance testing, do not use this product unless cleared by your sanctioning body as it may cause a false reactive result for a urine or blood drug test.
