

KRE-ALKALYN®

Creatine Concentrate

Kre-Alkalyn® is a unique creatine concentrate that is synthesized using a patented process to give it a pH above 12. (U.S. Patent #6,399,661)

The highly alkaline pH protects Kre-Alkalyn® molecules in the digestive tract so that more creatine reaches your muscle cells intact. Kre-Alkalyn® is concentrated and can help your muscles achieve creatine saturation,* at much lower doses than other forms of creatine. In fact, taking one capsule of Kre-Alkalyn® is the same as consuming 7.5 grams of creatine monohydrate powder! That also saves you money.

Kre-Alkalyn® gives you immediate results, working from the very first dose—no "creatine loading" is necessary. Kre-Alkalyn® increases ATP stores in muscle, with resulting increases in muscle size and strength.* You get all of the benefits of creatine without common side effects such as bloating or intestinal distress—in easy to use capsules.

****In 2006, 24 healthy men from the Bulgarian National Weight Lifting Team increased their weight lift totals by 28.25%**
Stroychev, Kamen, N. Terziiski (2006). Comparison of Kre-Alkalyn to Creatine on body composition, muscular performance, & safety.
Dr. I.S. Greenberg Medical Center, Sofia, Bulgaria.
