

Recommendation: As a dietary supplement, stir one heaping teaspoon in an 8 oz. glass of water or juice, 2-3 times per day.

Jurassic Green is grown on nutrient dense virgin soil (a natural pre-historic lake bed) and harvested at peak times of nutritional value. The plants are immediately juiced and flash dried in a vacuum chamber at a temperature range of 85-90 degrees, which is a prime environment to retain the active enzymes, vitamins, trace minerals, amino acids and chlorophyll.*
