Known as the building blocks of protein, BCAAs are a proven way to support lean muscle maintenance, prevent training fatigue and promote recovery. Unfortunately, many BCAA formulas short-change results by failing to include EAAs (Essential Amino Acids) - and that's where HydroBCAA™ comes in. HydroBCAA™ is a complete amino acid and electrolyte replenishment formula designed as a comprehensive solution for your training and recovery needs.+

BCAAs

Branch Chain Amino Acids (Leucine, Isoleucine & Valine) are critically important for the stimulation of muscle protein synthesis, the reduction of protein breakdown and for preserving muscle glycogen stores. These amino acids are rapidly absorbed into the bloodstream, which makes them efficient and effective.+

EAAs

Essential Amino Acids are 'essential' to obtain through diet because the body cannot produce them on its own. They are the key to a variety of functions, including the production of cellular energy, promotion of cellular repair, promotion of healthy digestion, prevention of muscle breakdown, and more.+

2:1:1

MANUFACTURED
IN A cGMP FACILITY

SUGGESTED USE: As a dietary supplement, mix 1 scoop (14.5g) of HydroBCAA™ with 8-10 fluid oz. of cold water. HydroBCAA™ can be consumed prior to training, during training and after training for maximum efficacy.
