

Copper Sebacate

Copper deficiency is not common, but the absorption and utilization of copper can be hindered by elevated intakes of copper antagonists such as zinc, ascorbic acid and fructose sweeteners. The intake of copper as its sebacate salt improves its bioavailability.

Suggested Use

As a dietary supplement, 1 capsule daily with a meal, or as directed by a healthcare practitioner.

This nutrient is of the highest quality and purity obtainable, is free of all common allergens (antigens), and does not contain preservatives, diluents, or artificial additives.

Keep in a cool, dry place, tightly capped.
