

## Thymus Natural Glandular

This natural glandular material is processed by lyophilization of glands derived from government-inspected, range-fed animals, raised in New Zealand without hormones or antibiotics. The material is frozen, then subjected to a high vacuum that vaporizes moisture directly from the solid state, thereby maintaining biological activity of the material.

### Suggested Use

00325 CAP 3-12

As a dietary supplement, 1 or 2 capsules, two or three times daily with meals, or as directed by a healthcare practitioner.

This nutrient is of the highest quality and purity obtainable, is free of all common allergens (antigens), and does not contain preservatives, diluents, or artificial additives.
