Antioxidant defense*

Cellular protection*

Healthy inflammation response**

Unique Compounds, Unique Benefits

The easily absorbed ginger and turmeric oils in this high-potency formula are concentrated to deliver their key active compounds for maximum benefits.

- **Ginger** is a botanical relative of turmeric. In recent years, leading research shows that components of ginger oil—including gingerols and shogaols—fight against DNA-damaging oxidative stress and support a healthy inflammation response.*
- **Turmerones** from turmeric oil, a previously overlooked component of turmeric, have effects that are similar to curcumin. Emerging research shows that turmerones have unique benefits as potent antioxidants that optimize your cells' own protective abilities.*
