

Recommended Use: As an adult dietary supplement, take two (2) softgels daily with meals, or as directed by a healthcare practitioner.

Super Omega EPA/DHA™ provides ultrapure omega-3 EPA and DHA in high potency, synergized with patented cell membrane antioxidants to guard against breakdown into harmful free radicals during absorption. The American Heart Association, European professional associations along with the U.S. Food and Drug Administration have all acknowledged that EPA and DHA protect the heart and circulatory health. These functionally synergetic, vitamin-like nutrients protect all the cells and tissues against inappropriate tissue breakdown or proliferation. They are cell membrane building blocks, crucial to efficient metabolism yet often lacking from the modern diet. This formulation complements multivitamin-mineral supplements, which lack these crucial omega-3 fatty acids. Super Omega EPA/DHA™ would be a part of a core nutritional program.

The Food and Drug Administration (FDA) advises that "supportive but not conclusive research shows that consumption of EPA and DHA omega-3 fatty acids may reduce the risk of coronary heart disease."

Not to be used by pregnant or nursing mothers unless directed by a healthcare practitioner. Keep this and all dietary supplements out of the reach of children. Store in cool dry place with cap tightly sealed. Strict quality control is maintained during each step of formulation.
