

Doctor's Best Melatonin supplies melatonin, a naturally secreted substance in the body to help regulate circadian rhythm, often referred to as the "internal body clock", that tells our body when to sleep, rise, eat – regulating many physiological processes for the body and the brain to function normally. Certain factors may affect circadian rhythm such as individuals adjusting sleep-wake cycles with daily work schedule shifts or time zone changes and jet lags.*

Supplemental melatonin helps by regulating the onset of a quality and overall sleep with the benefits of a fast-acting and pleasant-tasting chewable tablet.*

Helps support circadian rhythm (internal body clock)*

Helps support healthy sleep cycle*

Helps support overall sleep quality*

Helps support cognitive function and brain health*

Helps support recovery from jet lag*
