

Recommended Use:

As a dietary supplement take two (2) capsules two times per day with meals. Higher intakes may be indicated, as directed by a physician.

The connective tissues are the packing matrix for all the body's cells, tissues and organs. Connective tissues underlie the skin, and are the foundations for the joints, vertebral discs, walls of the blood vessels, bones and countless other supporting and hardened tissues. Cumulative damage to the body's connective tissues can markedly affect quality of life. The nutrients in this formulation are clinically proven, either for the enzyme pathways that renew connective tissues or to help protect connective tissues from degeneration due to environmental factors or intrinsic processes gone awry. Connexin™ promotes connective tissue renewal, and thereby supports wound healing, blood vessel wall strength, renewal of the joint linings and the integrity of the intervertebral discs.

These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

Not to be used by pregnant or nursing mothers unless directed by a physician.

Keep this and all dietary supplements out of the reach of children. Strict quality control is maintained during each step of formulation.

WE USE USP/NF MATERIALS WHERE AVAILABLE.
