

Recommended Use: As a dietary supplement, two (2) capsules twice daily with meals. Intakes up to twelve (12) capsules per day may be taken for additional benefit, or as directed by a physician.

Ultra ImmunoGlycans Advanced™ is based on a large body of clinical research on the benefits of branched complex polysaccharides, especially beta-glucans and proteoglycans, for immune system competence and for whole body health. Ultra potent mycelial extracts for eight (8) prized mushroom species are rationally matched to generate balanced immune enhancement and potent pro-homeostatic support for the organs. These organically grown, zero-aluminum extracts supply 1,3- 1,4 and 1,6- beta-D-glucan molecules along with protein-glucan complexes (proteoglycans) featuring diverse 3 dimensional shapes. Dendritic cell vigilance becomes sharpened, killer cells and other immune cells proliferate, cell to cell immune coordination is improved. The mushroom immunoglycans act in synergy with the many additional nutrients, minerals, and macro-molecular structures of their mycelial extracts, resulting in the safe and effective homeostatic support for intestinal, liver, circulatory, lung, and brain health, and an overall boost to vitality and wellbeing.

WE USE USP/NF MATERIALS WHERE AVAILABLE.
