

Pancreas Glandular (Pork)

This natural glandular material is processed by lyophilization of glands derived from government-inspected, range-fed animals, raised in New Zealand without hormones or antibiotics. The material is frozen, then subjected to a high vacuum that vaporizes moisture directly from the solid state, thereby maintaining biological activity.

Suggested Use

As a dietary supplement, 1 capsule three times daily, taken one half hour to one hour before each meal, or as directed by a healthcare practitioner.

Pancreas Natural Glandular PORK may be used in rotation with Pancreas Natural Glandular BEEF and LAMB.
