Osteo SynergyTM

Dietary Supplement
Bone Nutrients with Ipriflavone

90 CAPSULES
Net Wt. 2.9 oz. (83 g)

Recommended Use: As an adult dietary supplement, 1-3 capsules 3 times daily with meals, or as directed by a healthcare practitioner.

Bone is the scaffolding upon which the entire body is constructed. Strong bone allows for body architecture that is consistent with proper organ distribution and good health, while weak bone endangers health by compromising the body's flexibility and increasing the risk of fracture. Bone is dynamic, living tissue that is routinely renewed and remodeled to suit the body's needs. Successful bone production requires many nutrients other than merely calcium. The nutrients in this formulation are chosen to support the building of new bone while optimizing nutrient bioavailability, safety, and tolerability.**
