

**Recommended Use:**

As a dietary supplement, one to three (1-3) capsules up to 3 times daily with meals, or as directed by a physician.

Bone is the scaffolding upon which the entire body is constructed. Strong bone allows for the body architecture that is consistent with proper organ distribution and good health, while weak bone endangers health through compromising the body's flexibility and increasing the risk of fracture with its attendant consequences. Bone is dynamic, living tissue that is routinely renewed and remodeled to suit the body's needs. Successful bone production requires many nutrients other than merely calcium. The nutrients in this formulation are clinically proven to support the building of new bone and to help retard net bone loss. Osteo Synergy™ provides the intakes needed while optimizing nutrient bioavailability, safety, and tolerability. Osteo Synergy™ promotes bone renewal also by providing Ipriflavone, a substance proven to facilitate net bone mass addition.

Not to be used by pregnant or nursing mothers unless directed by a physician. Keep this and all dietary supplements out of the reach of children. Store in cool dry place with cap tightly sealed. Strict quality control is maintained during each step of formulation.
