

TG 100 Natural Glandulars

Provides tissue from the thyroid gland, and other glands associated with thyroid function.* This natural glandular material is processed by lyophilization of glands derived from government-inspected, targeted animals, raised in New Zealand without hormones or antibiotics. The material is frozen, then subjected to a high vacuum that vaporizes moisture directly from the solid state, thereby maintaining its biological activity.

Suggested Use

As a dietary supplement, 1 capsule one to three times daily with meals, or as directed by a healthcare practitioner.

Variations in product color may occur. Keep in a cool, dry place, tightly capped.

Lot # 00703 Exp. 7/12
