

There is ZERO Doubt SizeOn™ Will:

- ➔ Accelerate Protein Synthesis & Muscle Force Recovery†
- ➔ Increase Muscle Volume, Muscle Fiber Size, Cell Volume & Plasma Amino Acid Levels‡
- ➔ Amplify S6K1 and 4E-BP1 Signaling and Hypertrophic mTOR Pathway Conduction‡
- ➔ Initiate & Sustain Myogenesis and Muscle Recovery While You Are Still Training‡
- ➔ Deliver Vital Nutrients, Essential Minerals, and Growth Cofactors To Skeletal Muscle Tissue‡
- ➔ Harness the Insulintrophic and Anabolic Power of Pterostilbene‡

SizeOn Proprietary Blend	61 g

Outlast® Insulin Matrix	*
Palatinose™ (Isomaltulose), D-glucose, Trehalose, Pterostilbene	
Protein Synthesis Acceleration Matrix	*
Whey Protein Hydrolysate, L-Leucine (5 g), L-Isoleucine, L-Valine, L-Ornithine-L-Aspartate	
PhosphoDrive Endurance Complex	*
Creapure® (Creatine Monohydrate), Creatine MagnaPower® (Magnesium Creatine Chelate), Disodium Creatine Phosphate	
OsmoDrive Advanced Hydration Complex	*
L-Taurine, Sodium Glycero-phosphate, Calcium Glycero-phosphate, Potassium Glycero-phosphate, Sustamine™ (L-Alanyl-L-Glutamine), Magnesium Glycyl Glutamine	

†Percent Daily Values are based on a 2,000 calorie diet.

*Daily Value not established.

Other Ingredients: Malic acid, citric acid, natural and artificial flavors, salt, silica, sucralose, FD&C Red No. 40, acesulfame potassium.

ALLERGEN WARNING: Milk

DRAMATIC RESULTS FAST • FULL MONTH SUPPLY

Gaspari Nutrition took Sports Nutrition to the highest level with the original SizeOn™, the original intra-workout creatine drink. There wasn't any doubt it represented a serious innovative leap forward in the creatine category. The original SizeOn formula clearly demonstrated its effectiveness in a clinical setting and quickly became known as the King of Creatines. As clinical research advances, so does Gaspari Nutrition which is why SizeOn has now evolved into the Ultimate Hybrid Intra-Workout Whey Hydrolysate Creatine Formula. Once again Gaspari Nutrition raises the bar even higher in the sports nutrition industry!

Your body requires that proteins from whole food, whey isolate, casein, etc., be broken down in a process called "hydrolyzation". This is an integral process which allows di and tripeptides to be absorbed and utilized for numerous processes including muscle building and repair. The problem is that while your muscles are starving for these nutrients (i.e., during exercise) your body *must* digest them into smaller peptides. Research has shown that these are absorbed even faster than free form amino acids. For this reason Gaspari Nutrition uses a high quality whey hydrolysate that contains over 50% di and tripeptides as well as a large array of anabolic promoting ingredients such as a high dose of L-LEUCINE (5 grams) to allow for unparalleled increases in athletic performance, skeletal muscle recovery, explosiveness and most notably, immediate increases in muscle size WHILE YOU ARE STILL TRAINING!

Furthermore Gaspari Nutrition researchers have harnessed the power of pterostilbene which is our patent pending and brand new insulinogenic secretagogue picked specifically to work in concert with our famed and patent pending Outlast® carbohydrate blend. Outlast® is a patent pending blend of three complex sugar molecules that lasts up to 5X longer than plain maltodextrin. The powerful combination initiates and sustains muscle volumization and anabolism to levels never seen before in a sports nutrition product. Pterostilbene, is milligram per milligram, by far the most powerful insulinotropic compound ever utilized in a dietary supplement. To top it off, we also included LOLA™, our cutting-edge, ammonia scavenging amino acid salt of L-Ornithine and L-Aspartate to help battle fatigue. The bottom line is that Gaspari Nutrition has once again outdone itself and yet again redefined the very category it created!

Every single ingredient in SizeOn was selected specifically and solely for the scientific evidence to support efficacy and safety. You can be assured this product is formulated based on VALID scientific research and not overhyped nonsense which doesn't deliver the results you demand and pay for!

DIRECTIONS: SizeOn is meant to be taken once per day, on training days WHILE you train, 5 - 6 days per week. Mix one scoop in 20-30 ounces cold water and sip throughout your workout. Should the need arise, add more water as necessary throughout your workout for proper hydration.

WARNING: Seek the advice of a health care practitioner before use. Not suggested for use in children under the age of 18 or in people who have been diagnosed with hypertension, kidney disease, liver disease, metabolic syndrome, diabetes, neoplastic condition such as cancer or thalassemia. Do not use if pregnant or nursing. **KEEP OUT OF REACH OF CHILDREN.**

Note: Do not store in direct sunlight, store in a cool dry place.
