

L-Arginine is a naturally occurring amino acid vital for a variety of biochemical reactions in the body.[†] L-Arginine is converted in the body into a chemical called nitric oxide. Nitric oxide causes blood vessels to open wider for improved vascular function.[†] L-Arginine is also involved in cell division, muscle protein synthesis, immune and cardiovascular functions, insulin stimulation, and the stimulation and support of many other substances in the body.[†]

†These statements have not been evaluated by the FDA. This product is not intended to diagnose, treat, cure, or prevent any disease.

Warnings: Pregnant or lactating women and people with known medical conditions and/or taking drugs should consult with a qualified healthcare practitioner prior to taking dietary supplements.
