Shatavari powder

Nourishing tonic for women and men*

Maintains a healthy female reproductive system*

Supports healthy lactation*

Supports the healthy production of semen*

Shatavari (*Asparagus racemosus*) is a rejuvenating herb that cools the body and strengthens and nourishes the tissues. Traditionally used to maintain the healthy production of female hormones, shatavari may be translated as "100 spouses," implying its role in promoting fertility and vitality. As a nutritive tonic, it encourages the healthy production of milk in lactating mothers and the healthy production of semen in would-be fathers. It is also useful during menopause and for women who have had hysterectomies. Shatavari supports a healthy immune system and assists in both physical and mental digestion. Its unctuous quality soothes the membranes of the lungs, stomach, kidneys, and reproductive organs.*

Suggested Use: ¼ to ½ teaspoon with warm water, once or twice daily, or as directed by your health practitioner.

If you are pregnant, nursing, taking medications, or have a medical condition, please consult with your health care practitioner prior to the use of this product.
