

Product Description

New Body Herbs CKLS is a herbal colon, kidney, liver, and spleen cleanser and detoxifying agent. It functions as a natural remedy for constipation and other lower digestive tract disorders.

The colon, kidney, liver and spleen work together to rid your body of the toxic buildup that is known to cause disease. The colon stores food wastes, the liver processes and neutralizes toxins that may have leaked out from a poor colon, and the kidneys and spleen filter the neutralized toxins from the blood stream to eliminate them from the body.

The source of disease can be traced all the way back to the colon. It is here that food waste is allowed to accumulate in order to be expelled from the body later. Some of these toxins are given the chance to escape and reach other areas of the body. When there are issues with your colon's function, such as with constipation, this food waste begins to ferment and rot. This causes your colon to become toxic and might let some of these toxins out from the colon. Herbal colon cleanse detoxes, such as New Body Herbs CKLS are then used to correct this toxic buildup.

This remedy combines the detoxifying actions of Cascara sagrada, and aloe vera, with the soothing actions of mullein and chamomile. New Body Herbs CKLS then goes a step further by providing the cleansing and sterilizing actions of Uva ursi, cayenne, and eucalyptus, and boosts your body's ability to naturally digest foods with dandelion. Together this combination of herbal colon cleansers and detoxifiers work to prevent the buildup of this toxic food waster in your colon, and helps to flush out existing toxins.

The best part of New Body's CKLS formula is that it can be used successfully to help eliminate toxins from the colon, as well as the kidney, liver and spleen without causing any griping!

*To be used in conjunction with New Body Products' cold-pressed, unrefined Olive Oil.

Ingredients

Ingredients: Aloe Vera Resin, Chamomile, Cascara Sagrada, Mullein, Uva Ursi, Fenugreek, Cayenne, Dandelion, Eucalyptus
